PART 1 - OUR BRAND

BRAND ORIGIN STORY

Founders:

Jo Buttigieg and Stephen Sumner

Founder's Background and Brand Origin Story:

Passions and Talents:

- **Jo:** Creativity, developing new concepts and recipes, a love for cake, maintaining a big-picture perspective, goal-oriented and structured.
- **Stephen:** Expertise in tech, equipment, innovation, learning new things, technical and mechanical skills, performing well under pressure.

Why They Started the Business:

- Jo, a vegan since age 25, wanted her kids to enjoy flavourful plant-based cakes. When Stephen was made redundant and Jo was pregnant with their second child, they joined the New Business Scheme.
- As vegans ten years ago, they experienced a lack of tasty plant-based options. They aimed to supply cafes with delicious cakes, hoping to enjoy the café experience themselves.
- Despite having no prior experience as chefs or bakers, they perfected their recipes through trial and error, receiving positive feedback from cafes. They successfully scaled up their recipes to a commercial level.

Background and Motivation:

- Both Jo and Stephen grew up around cake shops owned by their families, providing them with a strong understanding of what great cakes should taste like.
- Although not raised as vegans, they aim to create plant-based cakes that match the flavour of traditional cakes. They want to prove that environmentally friendly and delicious cakes are possible.

- They overcame initial lack of support from their families, who dubbed their creations "hippie cakes," motivating them to succeed even more.

Personal Values and Definition of Success:

- **Jo:** Values family time, work-life balance, and being present with her children. Enjoys outdoor activities and aims to create memorable life experiences for her kids.
- **Stephen:** Values financial freedom, professional recognition, and being a pioneer in plant-based baking. Enjoys teaching and coaching kids, emphasising perseverance and hard work.

Goals:

- Growing their revenue from \$5k-6k a week to \$9k-10k a week, aiming for \$50k-60k per month.
- Achieving financial freedom and public recognition for their brand.
- Helping vegans share their passion for plant-based cakes with their families and friends.
- Ensuring kids with dietary requirements feel included in celebrations.

Ideal Client:

- Mums and dads planning custom birthday cakes.
- Teens and young adults (16-30s) looking for trendy, vintage cakes.
- Customers who appreciate beautiful, great-tasting cakes that happen to be plant-based and planet-friendly.
- Those who value quality and design, enjoying cakes that feel "accidentally vegan."

Differentiation:

The Cake People offer planet-friendly, inclusive products without compromising on taste or quality. They create unique flavours and ensure their cakes are delicious upfront, with ethical considerations in the background.

Personal Reflections:

- Jo feels most creative when watching other cake decorators are able to create and when she's given creative freedom. She feels valued when customers proudly share photos of their cakes.
- Stephen thrives under pressure, feeling a sense of control when following a planned schedule. Both Jo and Stephen believe in the quality of their product and the potential for their brand to grow.
- They are proud to be pioneers in mainstreaming plant-based options, aiming to continue leading in this field.

BRAND BELIEFS AND AFFILIATIONS WITH CAUSES

Causes Affiliated With:

Sustainability

Private Belief: Creating a kinder planet by being respectful and considerate to all beings – "Do no harm; know better, do better."

Public Belief: Sustainability and planet-friendly, ethical business practices.

Inclusivity

Ensuring no one misses out on celebrating due to dietary requirements.

Relationship to These Causes:

The Cake People actively engage in sustainable, ethical, and inclusive practices to create positive change. They prioritise these values in every aspect of their business, from sourcing ingredients to customer service.

Importance of These Causes:

These causes matter deeply to the founders because their children missed out on treats and celebrations due to dietary restrictions, and they've experienced negative perceptions and comments around them being vegan themselves from family and friends.

Their commitment to sustainability stems from ethical considerations of animal welfare and has grown to include environmental concerns.

Customer Perception:

The ideal customers are either neutral or supportive of these beliefs. While the brand doesn't lead with these causes, individuals with dietary issues will appreciate the inclusive plant-based options.

Public Branding Strategy:

The brand emphasises sustainability, planet-friendly practices, and inclusivity around dietary requirements. These core values are central to The Cake People's public branding strategy.

Top 4 Brand Beliefs:

Inclusivity is at the heart of our brand, as we believe everyone deserves to enjoy a beautiful and delicious cake.

3. Attention to Detail

Our attention to detail guarantees that every cake not only meets but exceeds expectations in both appearance and taste. We meticulously craft each cake with precision and care, ensuring that every design element and flavour profile is perfectly executed. OUR BRAND ESSENCE

What Sets Us Apart:

Our commitment to customers means we go above and beyond to ensure satisfaction. We innovate in our recipes to create new, exciting flavours, and our attention to detail ensures every cake looks and tastes consistently excellent.

We make plant-based cakes that are as good as, if not better than, conventional cakes, allowing customers to make planet-friendly choices without compromise.

Our inclusive and flexible variety means our cakes can be enjoyed by everyone, allowing kids (or anyone) with allergies and dietary requirements to feel included, not excluded.

Resonating with Our Audience:

As busy parents ourselves, we understand the time pressures and the struggle of starting a business. We know what it feels like to be excluded due to dietary requirements and the joy of being included when someone goes out of their way to

accommodate special needs. We've experienced the stress of finding an edible cake for special dietary needs and the humiliation of "special" order meals that aren't prepared with care. Now, we bring the experience of inclusive, delicious cakes to everyone, ensuring no one feels excluded.

Why People Want to Work with Us:

We are approachable, friendly, and attentive to our customers' needs. We excel at connecting with our customers and creating the perfect end result, consistently delivering designs that they love. Our track record of no complaints speaks to our dedication to quality.

We under-promise and over-deliver, adding the right details to bring ideas to life while maintaining the integrity of the cake. Our hard work, high expectations, and trustworthiness ensure that we always deliver quality consistently.

Current Interests Connecting Us to Our Audience:

We share a strong commitment to sustainability and doing our part for the planet. We are involved in kids' sports and have a passion for sweet flavours. Our love for cake and baking connects us deeply with our audience, who share these interests.

Customer Treatment:

We believe in treating our customers with respect, patience, and appreciation. Every interaction is an opportunity to show them that we value their business and are dedicated to meeting their needs.

Customer Feelings about Our Business:

We want our customers to feel a deep sense of trust, knowing that they won't have to stress about their cake order and that we will get it right. We aim for them to feel included, understood, grateful, happy, and proud.

Our goal is for them to believe they've received the best cake they've ever had, with every detail taken care of by us, and feel represented by our inclusive and thoughtful approach.

Problems We Help Solve:

We provide cakes for events that everyone can enjoy, taking the stress out of ordering with the ease and flexibility of online transactions. We save busy parents time by offering delivery to venues.

Our commitment to innovation ensures there is always something new and exciting, with the latest trends and styles, so customers never get bored.

Thoughts and Feelings in the Way:

Customers might perceive our cakes as expensive, not understanding the hand-made, custom nature of our products. The expense of a commercial cake compared to a home-made one by a part-time mum can be a hurdle. There may be a lack of appreciation for the attention to detail and professionalism required for a perfect cake for a major event.

Not having a shop front where they can see the cake in person can lead to doubts. Customers might not be confident they will get the result they see in photos, thinking images are retouched or edited. Misunderstandings about what is edible and not reading the description can also be obstacles.
